RELY ON RUGGED PERFORMANCE

For your most demanding applications, you can count on *Xi*III*Plus* printers to come through for you. *Xi*III*Plus* printers maximize throughput with 16 MB SDRAM memory, and store ample label formats, graphics, and fonts with 4 MB non-volatile Flash memory. They're also the most rugged, durable printers available, standing up to even the dirtiest, dustiest, most demanding round-the-clock operations imaginable!

> **During a rainstorm at a manufacturing facility, a collapsed roof dumped 576,000 lbs. of water on a Zebra *Xi* series printer. Bruised, but not beaten, the cleaned printer kept spewing out labels right where it had left off.**

Plus, *Xi*III*Plus* printers handle all types of media for specialized bar code labeling applications across various industries. With over 260 UL/CSA-approved combinations of labels and ribbons available from Zebra, it's easy to find the perfect supplies for your application. Rugged Genuine Zebra® Supplies perform in even the harshest of environments, including sub-zero temperatures, extreme heat, moisture, abrasion, and chemical baths. Using Zebra labels and ribbons guarantees optimal performance from your *Xi*III*Plus* printers.

Xi Series
High-Performance Bar Code Printers

Connect with it. Count on

Xi Series

*Xi*III*Plus* printers from Zebra offer revolutionary features including:

- 32-bit processor for faster throughput and processing speeds
- Increased 16 MB SDRAM memory for printing longer label formats
- CompactFlash® (up to 256 MB memory) for added label format/font storage
- 4 MB non-volatile Flash memory
- Early warning notification for printhead maintenance support
- USB 2.0 port for flexible connectivity and faster throughput
- 300 unique darkness settings—great for fine-tuning print quality
- XML-Enabled Printing Option—direct connect integration for bar code label printing
- ZebraNet® Wireless Print Server—Secure wireless network connectivity for location-independent printer operations anytime, anywhere
- Flexible 10/100 Ethernet connectivity for high-performance and industrial strength printers
- ZebraLink™ offers effortless installation and convenient real-time, remote printer management

It's *Xi*, plus more!

Zebra's *Xi* series is known for its high performance, mission-critical ruggedness. And now with 4-, 5.5-, 6-, and 8-inch print widths, more resolution and connectivity options, plus industry-leading Zebra service, *Xi* series offers the only true, full-function family of printers in its class. This is one of the many reasons why more than 90% of Fortune 500 companies rely on Zebra for their labeling and bar coding solutions.

Providing superior performance, longevity, and solid value, the *Xi* series offers rugged durability, dependability, and unparalleled reliability in mission-critical and specialty labeling solutions. Insuring investment protection are key features and options, such as 203-, 300-, and 600-dpi resolution for paper, synthetic, and specialty stocks; a 32-bit processor for fast throughput and processing; increased memory for label formats, graphics, fonts, and data; and early warning notification for printhead maintenance support. *Xi*III*Plus* printers also offer more connectivity options than competitors, including XML-enabled printing, ZebraNet wireless and wired print servers, and USB 2.0. It's easy to see why *Xi*III*Plus* printers take high performance to an all-new level!

Built Tough. Built Solid. Built Smart.

The 110*Xi*III*Plus* affords flexibility and affordability. Starting at just $2,995 (U.S.), it offers a choice of 203-, 300-, and 600-dpi resolution and prints up to 4 inches wide, making it ideal for a wide variety of general labeling applications, such as shipping, warehousing, and manufacturing, as well as specialty needs, such as small labels where crisp, high-quality print is required.

High-Speed Performers

The 203-dpi 140*Xi*III*Plus* and 170*Xi*III*Plus* print up to 12 inches per second for quick on-demand or batch printing in busy shipping/receiving areas and other applications.

Compliance-Label Champion

The industrial-strength 170*Xi*III*Plus* with 203- or 300-dpi can print labels up to 6.6 inches wide—promoting greater productivity by requiring fewer roll changes when printing large numbers of information-rich AIAG, ODETTE, UCC/EAN-128 and other labels on demand or in batches.

Wide-Label Wonder

The wide-web, 203- or 300-dpi 220*Xi*III*Plus* delivers 8.5-inch-wide printing up to 39 inches long for chemical drum HAZMAT labels, automotive and appliance industry labels, and large documents and invoices that may require graphics or small fonts.

Direct-Connect Simplicity

Our XML-enabled printers simplify and speed bar code label printing integration into many leading supply chain management and manufacturing system applications. Eliminating software licensing and print server hardware costs, and reducing administration and programming, the XML option delivers a printing solution with lower total cost of ownership.

Cut the Cord!

The ZebraNet Wireless Print Server option provides added flexibility for wireless Ethernet capabilities. It eliminates the costs associated with recabling as well as the hassles of reconfiguring and moving Xi printers.
